

Don't let 2022 come to a close without stocking up on all your veterinary necessities. Receive end-of-year specials on tried-and-true items, catch the year's best product launches, and learn about exciting supplies and equipment to come from these companies.

Equine Practitioner

PRODUCT GUIDE

GETTY IMAGES

ADM (see page 52)

Demands of exercise are a stressor for the performance horse. Heavy work can overwhelm the body's natural ability to deal with oxidative stress, which can damage muscle proteins, lipids, and DNA, release pro-inflammatory cytokines leading to muscle pain, and damage the mitochondrial membrane, decreasing energy production. Performance Advantage RECOVERY+ was designed to help the performance horse combat the stress of exercise.

Arthrex Vet Systems (see page 43)

Defects in articular cartilage can induce osteoarthritis. With the IRAP ProEAS System, monocytes from the animal's harvested blood bind to the glass beads in the device, stimulating the regenerative and anti-inflammatory proteins during incubation. The autologous serum produced may be used to treat mild to moderate osteoarthritis in animals.

Arthrexvetsystems.com

ASPCA Pet Health Insurance (see page 6)

Finally there's horse insurance that makes sense for every horse from the ASPCA Pet Health Insurance program! Veterinary reimbursement plans are standalone; no mortality insurance required. Visit protectyourhorse.com. The ASPCA is not an insurer. Insurance underwritten by the United States Fire Insurance Company, produced by C&F Insurance Agency Inc.
