PRODUCT GUIDE

ADM (see page 44)

Demands of exercise are a stressor for the performance horse. Heavy work can overwhelm the body's natural ability to deal with oxidative stress, which can damage muscle proteins, lipids, and DNA, release pro-inflammatory cytokines leading to muscle pain, and damage the mitochondrial membrane, decreasing energy production. Performance Advantage RECOVERY+ was designed to help the performance horse combat the stress of exercise.

Asto CT (see page 29)

The Equina by Asto CT offers high-quality CT for diagnostic imaging specifically designed to meet the diverse needs of equine patients. With low radiation dose and simple patient positioning to scan limb pairs and head and neck, the Equina safely images standing sedated equine patients in seconds with ease.
